

SPS METALS ROOFINOX

TIN-PLATED STAINLESS STEEL

The Tin-Plated Stainless Steel for Timeless Roofing

Roofinox Tin-Plated Stainless Steel combines the strength and durability of 316L or 439 stainless steel with an electroplated tin coating that naturally develops a beautiful matte gray patina over time. Roofinox is approximately 35% softer than other tin-coated stainless steels on the market. This allows for the Roofinox Tin Matte to be stretched, shrunk, and hand-seamed on-site, and can even be deep-drawn when required.

For architectural roofing that performs in every climate and looks better with time.

PRODUCT AVAILABILITY

26 GAUGE (0.0187")

26 gauge (0.0187") thickness
for strength, formability,
and long-term performance

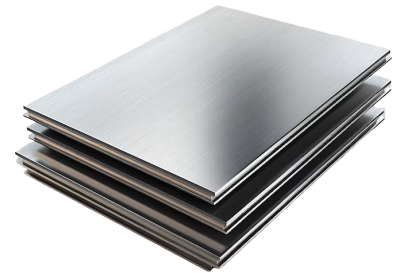

316L & 439 COIL

39.4" COIL WIDTH

Premium 316L stainless steel
with tin coating on both sides

316L & 439 SHEETS

39.4" x 120" SHEETS

Available in 316L or 439 stainless steel
with tin coating on both sides

316L AUSTENITIC STAINLESS STEEL

- Excellent corrosion resistance
- Ideal for coastal and demanding environments
- Non-magnetic (may be slightly magnetic after cold working)
- Long-lasting performance

439 FERRITIC STAINLESS STEEL

- Cost-effective alternative
- Magnetic
- Stable pricing
- Excellent for architectural roofing
